About This Guide

1. Coding Styles for if Statements and case Statements	
Basic if and case Statements	1-1
Simple case Statement	1-8
2. Coding if and case Statements for Late Arriving Signals	
Sequential if Statements: Late Arriving Data Signal	2-1
Single if Statement: Late Arriving Control Signal	2-4
if Statement With Nested case Statement: Late Arriving Data Signal	2-9
case Statement With Nested if Statement: Late Arriving Control Signal	2-15
3. Coding Styles for Logic Building Blocks	
Decoder	3-1
Priority Encoder	3-6

Reduction XOR	3-15
Multiplexer	3-21
4. High-Performance Coding Techniques	
Data-Path Duplication	4-1
Operator in if Condition	4-8
5. General Coding Style Guidelines	
Unintentional Latch Inference	5-1
Incomplete Sensitivity Lists	5-3
Unnecessary Calculations in for Loops	5-4
Resource Sharing	5-5
